

# Maze Project

Dinesh P. Mehta

April 5, 2019

# Maze Project

## ■ Individual Project.

# Maze Project

- Individual Project.
- 125 points (1/8 of the course grade).

# Maze Project

- Individual Project.
- 125 points (1/8 of the course grade).
- An extra credit opportunity.

# Advice/Tips

- Not meant to be an algorithms design project.

# Advice/Tips

- Not meant to be an algorithms design project.
- Use an existing well-known graph algorithm to solve the problem.

# Advice/Tips

- Not meant to be an algorithms design project.
- Use an existing well-known graph algorithm to solve the problem.
- Shouldn't need to change the algorithm, just plug-and-play.

# Advice/Tips

- Not meant to be an algorithms design project.
- Use an existing well-known graph algorithm to solve the problem.
- Shouldn't need to change the algorithm, just plug-and-play.
- The tricky part is how to model the maze problem as a graph.

# Advice/Tips

- Not meant to be an algorithms design project.
- Use an existing well-known graph algorithm to solve the problem.
- Shouldn't need to change the algorithm, just plug-and-play.
- The tricky part is how to model the maze problem as a graph.
- Think before you code.
